

NUVOLARI
LEGEND

USER MANUAL

EBERHARD & CO

Manufacture Suisse d'Horlogerie depuis 1887

The Eberhard & Co. watch manufactory was founded by Georges-Lucien Eberhard at La Chaux-de-Fonds back in 1887. Ever since, the venture has specialised in the making of chronographs.

In this capacity, it has attained a highly respected position in the world of high-grade watches. With the introduction, at a later stage, of sportively elegant watches it has furthermore augmented this status of the Eberhard & Co. brand name.

Eberhard's success story is backed by consistent deployment of advanced technology, meticulous craftsmanship and, not least, by observing that long tradition of superior workmanship which has made Swiss watchmaking a household name.

Today, with well over 130 years gone by, watches by Eberhard & Co. continue to stand for that high-grade quality and those excellent virtues which will please even the most demanding of connoisseurs.

NUVOLARI LEGEND

There are some people in the history of sport that cannot be defined merely as 'champions'. When they exceed the limits set by their time and enter the superhuman 'Hall of Fame' of those who have broken all barriers by crossing the line of the inconceivable, it is then that they undergo the natural progression that turns them into legends.

Tazio Nuvolari, the champion driver who dominated the decades between 1920 and the late forties, is quite obviously such a sportsman. Eberhard & Co. decided to celebrate his enterprises by creating a collection that bears his name, mainly consisting of sports watches, and enriched with many versions over the years. Some of these have been inspired by great victories or enterprises realized by the champion. The latest, **Nuvolari Legend**, seeks to celebrate the essence of the man and of the sportsman, consecrating him among those who will never be forgotten.

INFORMATION REGARDING THE INTERNATIONAL GUARANTEE

We hereby guarantee your Eberhard & Co. watch against any defect in manufacture or materials for a period of 24 months, subject to normal conditions of use.

This guarantee does not cover:

- damage caused by improper technical handling or by shocks
- wear of the strap, glass or any other part due to normal watch use
- eventual shipping and insurance charges.

To have your Eberhard & Co. "Nuvolari Legend" model serviced or repaired, please contact only technical service facilities authorised by Eberhard & Co.

We recommend to have the movement checked or overhauled every 3 years on average.

We aim to your full satisfaction.

- A Pushbutton to start and stop the chronograph device
- B Pushbutton for setting to zero all hands of the chronograph
- C Screw-in crown, water-resistant
- D Hour hand/watch
- E Minute hand/watch
- F Centre second-hand/chronograph

- G Minute hand/chronograph
- H Hour hand/chronograph
- I Tachymeter scale on the dial for speed in kilometres per hour
- L Tachymeter scale on the bezel for speed in miles per hour

CHARACTERISTICS

Automatic chronograph movement, 28800 vibrations, shock-resistant, antimagnetic, 25 jewels, 16 blue screws. Micrometric index (regulator) for fine adjustment of the watch rate. “Glucydur” balance wheel; this regulating part of the movement is made of a stainless alloy for compensating the variations in temperature and it secures the stability of the rate of the watch. Sapphire glass, anti-glare.

DISTINCTIVE FEATURES OF THE MOVEMENT

Our technical development department has subjected the movement to a particular constructive and aesthetic care that has allowed to obtain big counters and to house the spiral tachometer scale to read intermediate times.

The “Nuvolari Legend” model is characterised by the following features:

- luminescent numerals and hands with high visibility
- time-taking to 1/5 of a second
- time-taking of up to 30 minutes
- time-taking of up to 12 hours
- tachometer scale in km/hour on the dial

The “Nuvolari Legend” is available in the following versions:

- case in 39,5 mm or 43 mm in high-grade stainless steel. The movement can be admired through the transparent sapphire crystal base, which is secured by eight screws. The oscillating weight is customized with the historic stylised Alfa Romeo Type 12C. Available with an antiqued leather strap or a steel bracelet with clasp featuring a stylised reproduction of the mascot tortoise.

The water-resistance is guaranteed up to 30 m.

EFFECTS FROM MAGNETIC FIELDS

It is recommended that you do not leave your watch near electronic equipment (e.g. televisions – cell phones – refrigerators – microwave ovens – radio alarms etc.), which could, even at short distances, give off magnetic fields capable of magnetizing several components of the mechanical movement, causing variations in operational precision. In case of magnetization, the movement must undergo a simple demagnetizing procedure.

USE OF THE CROWN

POSITION A - Screw-in crown. In this position water-resistance guaranteed

POSITION B - To unscrew the crown, turn it counter-clockwise.
Position for hand-winding the movement

POSITION C - Neutral position of the movement

POSITION D - For setting the time

DIRECTIONS FOR USE OF WATER-RESISTANT WATCHES

The “Nuvolari Legend” model resists unintentional contact with water (rain or small splashes), but it is not fit for swimming, plunging or diving activities. Important: do not pull out the crown nor activate the pushbuttons as long as the watch is wet. We strongly recommend that you have the water-resistance checked at least once a year by a qualified technical service facility in order to find out if the gaskets need to be replaced.

PUSHBUTTONS

Make sure pushbuttons are always pressed in following order:

A : start

A : stop

B : return to zero

Abide by this sequence quite severely so as to preclude damage to the mechanism.

Don't activate the pushbuttons under water since they are not watertight while being pressed.

OPERATING INSTRUCTIONS FOR THE CHRONOGRAPH

Press pushbutton **A** to start the chronograph. Press it again to stop it. This will make it possible to read the counters (seconds, minutes and hours elapsed). Press pushbutton **A** again and the chronograph will function again after the intermediate stop. To reset to zero, the chronograph must be in the stop position and, by pressing the second push button **B**, all the hands will return to zero. You are recommended not to have the chronograph mechanism running constantly.

READING THE TACHOMETER SCALE - TACHOMETER SCALE IN KM/HOUR - BASIS 1000 M - ON THE DIAL

The outer rim on the dial shows the data needed for metering the speed of a vehicle over a distance of 1,000 metres. The moment the vehicle passes the first reading mark, the beginning of said 1,000 m distance, activate the hand **F** of the chronograph to start it and press again to bring it to a stop at the moment the vehicle passes the second reading mark. Said hand **F** will now indicate the average speed reached in km/h in tune with the tachometer scale. Example: when one kilometre is covered within 45 seconds, the average speed displayed by the centre second-hand **F** on the tachometer scale will be tantamount to a speed of 80 km/h.
